

# What's New at Lily School Paris

February 2020

After koalas, here are the ourangutan

We have been sponsoring Grant, a koala **Foundation**. With the terrible bushfires sponsorship until the end of this month.

ourangutan. In fact, since last June, a and her babies Oscar and Otis. Why is baby? Unfortunately, there are the babies as pets. We have been

and why we think it is important to protect them. To do this, we need to find an association who protects them in their natural environment. We ask you to help us in this project. Please send us your suggestions for associations supporting orangutans to our email [info@lilyschool.paris](mailto:info@lilyschool.paris) before March 10<sup>th</sup>.

adopted through the ***l'Australian Koala*** that hit Australia, we have extended the From March, we will be sponsoring an new mascot arrived at school: Odyssey the stuffed animal sold with a mum and a poachers that kill the mothers and sell studying the way of life of the ourangutan

## Intergenerational Activities

With the new year, our workshops at The Residence **Orpea/Castagnary** have begun again. In our last visit, we made crowns which was a great exercise for everyone in **fine motor skills** and **graphing**. We finished with singing and can't wait for the next visit.

## The Kid's Corner

During Winter Break, the yeti came to visit the children and taught them to play the piano and discover some of the cultural treasures of Paris such as: **The Egyptian portion of The Louvre**, the life of ants & the astronomy section at the **Palais de la Découverte**, the wild animals of the **Grande Galerie de l'évolution**, the zoo of Jardins des Plantes, and finally the **Museum of Quai Branly**. We were amazed to no end!

## What about culture?

### **QUI A COUPÉ L'EAU (WHO STOPPED THE WATER,)**

A musical and eco friendly show for children. It is a real eco friendly investigation. Kimo is a young and fearless girl. One morning she found out that water is not pouring from the tap anymore. She decides to **go all over the world** to understand who stopped the water and how does **the cycle of water** work. During her investigation she will meet a polar bear, a fish, and water engineer. The situation is quite alarming, but Kiko will discover **numerous important practices to save the planet**.
